We Insist On Our Value

We always care about our workers, customers, and partners, We grow and raise together.

We are always here to support you!

Raw Hair

Where from?

All of our hair is hand-selected and ethically sourced through third verified hair sellers. Mainly comes from the southwestern area of China, Indian temples, Vietnam, Europe. Girls and women were raised up in nature with healthy and long hair. The hair is voluntarily donated or sold for fair compensation.

Classification

According to its own character, so each strand can play its full beauty value, the hair is divided into 20 different types and 3 grades.

Hair Process

Craftsmanship is not a simple slogan, it is workers' daily craft and management in every step of hair processing.

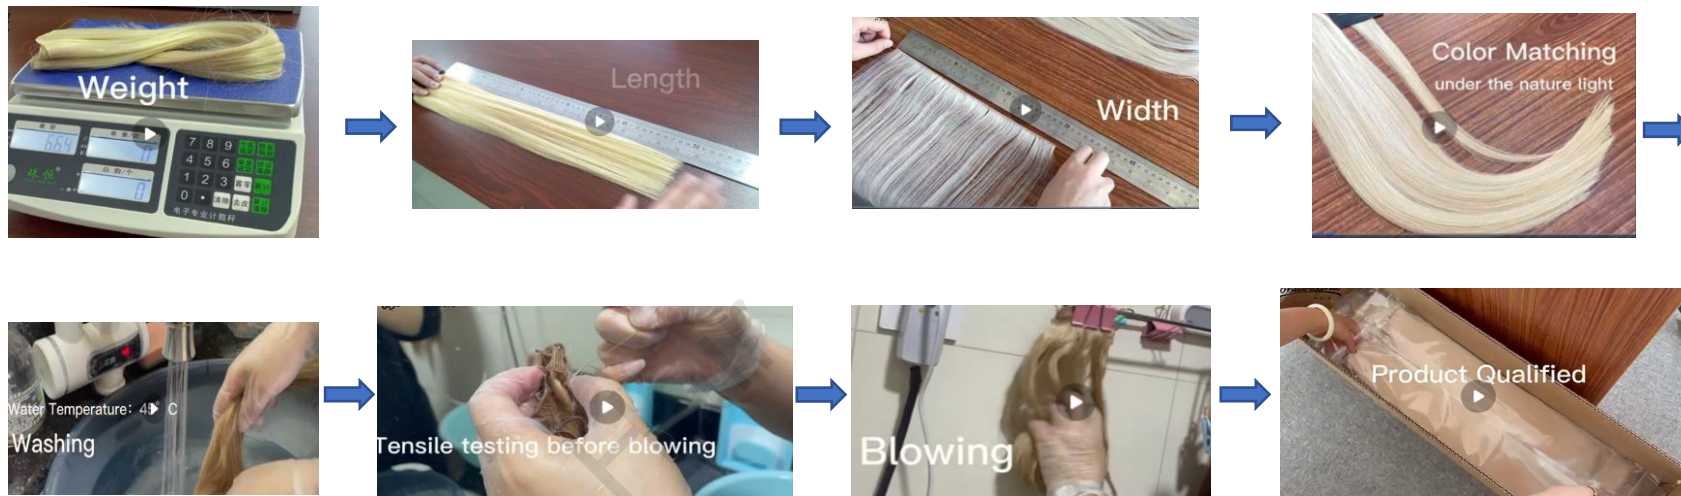

We are also committed to finding ways to improve quality and efficiency continuously. Develop automatic equipment to help workers to work easily.

We **employ gentle treatment technology**, Then the hair enters a special procedure to become Remy, retain the hair scales, lock the internal nutrition and moisture. All hand cleaned, combed, and glued to ensure that the hair is not damaged. This is the key to preserving hair health and color vibrancy.

Double Inspection

Inspect our hair products twice before packaging and before the hair products leave the factory.
